

Medical Alert Systems:

Cumberland Medical Center's Lifeline

A Personal Emergency Response System

There are many different health watch monitoring systems which can be purchased from medical companies or home security companies. We are very fortunate in the Cumberland County region to have the cost of the "*Lifeline Program*" offset by the Cumberland Medical Auxiliary of the Cumberland Medical Center. It is a community service program of the CMC Auxiliary. A subscriber rents a *Lifeline* unit for a monthly fee of \$25.00 . There are no other charges. The auxiliary will install a *Lifeline* unit and make monthly maintenance checks on the unit at no extra charge.

If you or someone you love lives alone, has limited mobility, suffers from a chronic medical condition, is at risk of falling, or has a complicated medical regimen the *Lifeline* offers a way to get immediate help when needed.
